

**ProSkill Inborn Talent Analysis Report**  
**Get a head start with your inborn talent**

### **Teach student in accordance with their inborn talent**

is the highest educational ideal since ancient times. However, nowadays it seems that just become more like a slogan. It is because it requires extremely high demands on educators such as rich experience, high responsibility and long-term observation to identify their talents. Now, through ProSkill Inborn Talent Analysis, we can solve these problems accurately and effectively, and truly teach them in accordance with their talent, and develop their strengths.

### **Life needs planning**

However, the planning is different from their parent's subjective desire because what parent expect may not the same as their kid's talent. It is necessary to understand their kid's inborn talent, characteristics, teach them in accordance with their talent to have a better future.

# Preface

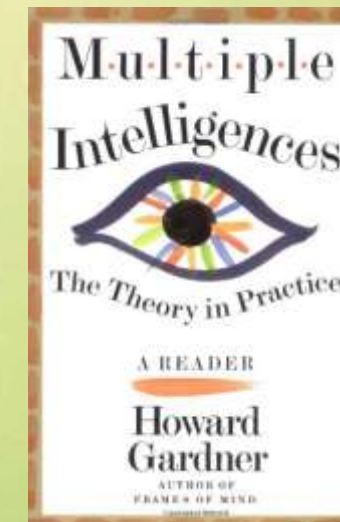

Everyone was born with talent and mission, but most people didn't understand what they have and some of them were sadly buried or inactive. They missed the best opportunity for cultivation at young age. Their parents, teachers and even their own didn't understand what kind of talent they have, they chose the wrong profession. Finally, they got a lot of quarrels and conflicts; become a mediocre person; often quarreling with partner and even divorcing. This has affected their life. Is there a tool to make for talent analysis? A very practical tool - ProSkill inborn Talent Analysis System was born. Parents and teachers can use it to understand their kid's talent information. This also make the professionals easier to choose their own handy areas.

1. **Dominant Eagle** Independent, bold, goal oriented, determined, target centric, aggressive, self-starter, in charge, stubborn, rigid, confident, self-centric, inflexible, bossy, controller, bullish, etc.
2. **Gregarious Ant** Imitation learner, co-operative, high learning ability, may lack of confidence, stretchable, calm, flexible, relationship oriented, people oriented, patient, need motivation, supportive, team player, sensitive, etc.
3. **Independent Peacock** Reverse thinker, discoverer, thinking out of the box, dislike following the world, creative, rule breaker, doing something new, milestone setter, doing something different, scientific thinking, dislike traditional style, impatient, working, curious, etc
4. **Steady Elephant** Unlimited potential, limited risk taker, highly flexible, lack of time management, conservative, lack of discipline, may be talkative, need support to perform, people oriented the best, friendly, need a guide, defensive, etc.
5. **Compliant Octopus** Good in communication, like challenges. Multi-way thinker, double standards, curious, like to join group, fickle, diversified, like to accept new things, wide range of interests, do not like the conflict, will accept other's views, loyal to challenges disloyal to job. etc.

DR. Howard Gardner, a renowned psychologist & educationist, is the Professor of Education at the Howard Graduate School of Education. In 2005 he was selected by foreign policy and prospect magazines. He has twenty books translated into twenty-seven languages, and several hundred articles, Gardner is best known in educational circles for his "Theory of Multiple Intelligence" proposed in 1983, which has been widely accepted by science all over the world. And today there are many schools across the worlds which are running on the education pattern of "Theory of Multiple Intelligence".

1. **Linguistic-Verbal Intelligence:** People who are strong in linguistic-verbal intelligence are able to use words well, both when writing and speaking. These individuals are typically very good at writing stories, memorizing information, and reading.
2. **Logical-Mathematical Intelligence:** People who are strong in logical-mathematical intelligence are good at reasoning, recognizing patterns, and logically analyzing problems. These individuals tend to think conceptually about numbers, relationships, and patterns.
3. **Visual-Spatial Intelligence:** People who are strong in visual-spatial intelligence are good at visualizing things. These individuals are often good with directions as well as maps, charts, videos, and pictures.
4. **Bodily-Kinesthetic Intelligence:** Those who have high bodily-kinesthetic intelligence are said to be good at body movement, performing actions, and physical control. People who are strong in this area tend to have excellent hand-eye coordination and dexterity.
5. **Musical Intelligence:** People who have strong musical intelligence are good at thinking in patterns, rhythms, and sounds. They have a strong appreciation for music and are often good at musical composition and performance.
6. **Interpersonal Intelligence:** Those who have strong interpersonal intelligence are good at understanding and interacting with other people. These individuals are skilled at assessing the emotions, motivations, desires, and intentions of those around them.
7. **Intrapersonal Intelligence:** Individuals who are strong in intrapersonal intelligence are good at being aware of their own emotional states, feelings, and motivations. They tend to enjoy self-reflection and analysis, including daydreaming, exploring relationships with others, and assessing their personal strengths.
8. **Naturalistic Intelligence:** Naturalistic is the most recent addition to Gardner's theory and has been met with more resistance than his original seven intelligences. According to Gardner, individuals who are high in this type of intelligence are more in tune with nature and are often interested in nurturing, exploring the environment, and learning about other species. These individuals are said to be highly aware of even subtle changes to their environments.

# About Us

HeroHelpMe Platform, is a web & app service platform for discovering personal inborn talents. The company own developed ProSkill Inborn Talent Analysis system is a scientific, leading, call-to-action and unique intelligent analysis system. It's developed to explore the talent potential of human beings, so that everyone can clearly and comprehensively use their talent for better life. Putting a talent people in the right position is a contribution to the value of life and human civilization.

# Our Culture

## ★ Our Mission

Helping Everyone Realize Opportunities

## ★ Our Vision

We contribute our strength in human resource solutions to help every individual, family, group & corporate to realize opportunities, to make dreams come true, to have harmonious family, to gather talent people and open a new era generation.

## ★ Our Value

People oriented and talented

## ★ Professional Team

10~20 years experiences Dermatoglyphics Consultant

## ★ Professional Platform

Own developed APP, ProSkill, Hero, Merchant & Dealer interface

## ★ Professional System

User friendly to everyone

**TIPS** ▶

**1** Hope that your kids can have some achievements but don't know where to start

**TIPS** ▶

**2** Don't want your kids' childhood to be filled up with just schooling but worry that they may miss the critical period of education

**TIPS** ▶

**3** Hope that your kids can learn something with their talent but don't know the exact talent

**Kid's childhood is very short, so must develop their talent as early as possible. Otherwise, you will miss their best develop age!**

	Earlier Test	Earlier Develop	Earlier Talent
Inborn Talent		Critical Period	Best Develop Age
Memory		1-60	1-13
Music		0-18	0-8
Drawing		0-18	0-10
Sports		3-22	3-7
Divergent Thinking		3-20	3-10
Logical Thinking		7-22	7-12
Emotional Shaping		1-30	1-17
Bravely Shaping		1-25	1-13

**About Our System**

ProSkill is an own developed system by HeroHelpMe Platform to analysis human inborn talent based on Genetic Dermatoglyphics. It comprehensively analyzes the natural talents of children. It provides parents kid's talent development guidance with unique personal scientific data.

**About Our Services**

- Kid Talent & Potential analysis: mainly for kids at age 3~12 , the most critical talent develop period. Earlier test to know earlier where is their talent, to get more efficiency result.
  - Use channels: early education institutions, etc.
- Develop Kid in Accordance with Their Inborn Talent analysis: mainly for kindergarten, primary school and junior high school & vocational school students to give them the right guidance and cultivation before age 16.
  - Use channels: kindergarten, primary school, middle school, vocational training school, etc.
- Course Suggestions: mainly for high school, university and international students to help them understand their own talent and potential, to get a proper direction before graduating from school.
  - Use channels: high school, university, graduate students, doctoral students, etc.
- Career Suggestions: mainly for individuals and entrepreneurs, to assist them in selecting the direction of career and team building with competitive advantages.
  - Use channels: human resources, job search, corporate recruitment, entrepreneurship centers, sales industry, talent market, etc.
- Interpersonal Analysis: mainly for kids, parent, family members , friends, colleagues relationship, to understand their characteristic will live with them with more harmonious and happier.
  - Use channels: family education, parent-child communication, husband and wife relationship, marriage agency, psychological counseling agency, etc.

**Just once in whole life, must test once in a life!**

★ Are you worried about your kid's future?

★ Are you feared of choosing the wrong direction in life?

★ Do you often feel that your kid always learn slower than other kids?

★ Do you feel hard to make decision for further studies?

★ Are you always overwhelmed by the choices of life?

★ We often say that choice is greater than effort, but what is the basis for your choice?

When facing with these questions, if you can master personal characteristics, inborn talent and interest, you will see clearly the direction of life, no longer need to stand on the crossroads .

## The Meaning of ProSkill Inborn Talent Analysis

More than 2000 years ago, the China "Supreme Master" Confucius taught his students in different way with his core principle of "teaching students in accordance with their talent". However, this requires extremely high demands on educators such as rich experience and high responsibility. It also need long-term observation to identify their student's talent. Everyone in this world has his own potential for development. We can't say which person is smarter but can say more likely to be talented in that field! Parents with certain professional knowledge have more advantages of observations on their kids in real life, which can help them to make more accurate choices. However, quite a few parents are influenced by themselves or social trends. This may highly cause people to choose the wrong learning profession and cause lifelong regret. For example, 80% of the failures in the college entrance examination were due to the wrong choice of arts and sciences. This problem not only plagues the majority of parents, but also plagues experts in the education sector. In fact, as early as half a century ago, scientists have discovered that talent energy is closely related to human inborn talent. In other words, "ProSkill Inborn Talent Analysis Report" is more likely a "map" that can lead people to explore their own intelligence. Through ProSkill Inborn Talent Analysis, we can truly teach students in accordance with their talent, and develop their strengths.

## Program Features

Using biotechnology informatics theory to study and explore the human inborn talent, potential, personal characteristic, temperament, thinking mode and behavioral style. Through the external appearance of genetics in the human body to activate and to achieve self-awareness & self-transcendence of scientific application system.

### Our Main Tasks of ProSkill Inborn Talent Analysis System:

1. Research & develop on life information technology & application programming;
2. Establish ProSkill system platform, talent & human resources databases;
3. Through the feedback from organization and market operation, to maximize the talent activation, sequencing and strengthening;

### Our Main Prospects & Fields of ProSkill Inborn Talent Analysis:

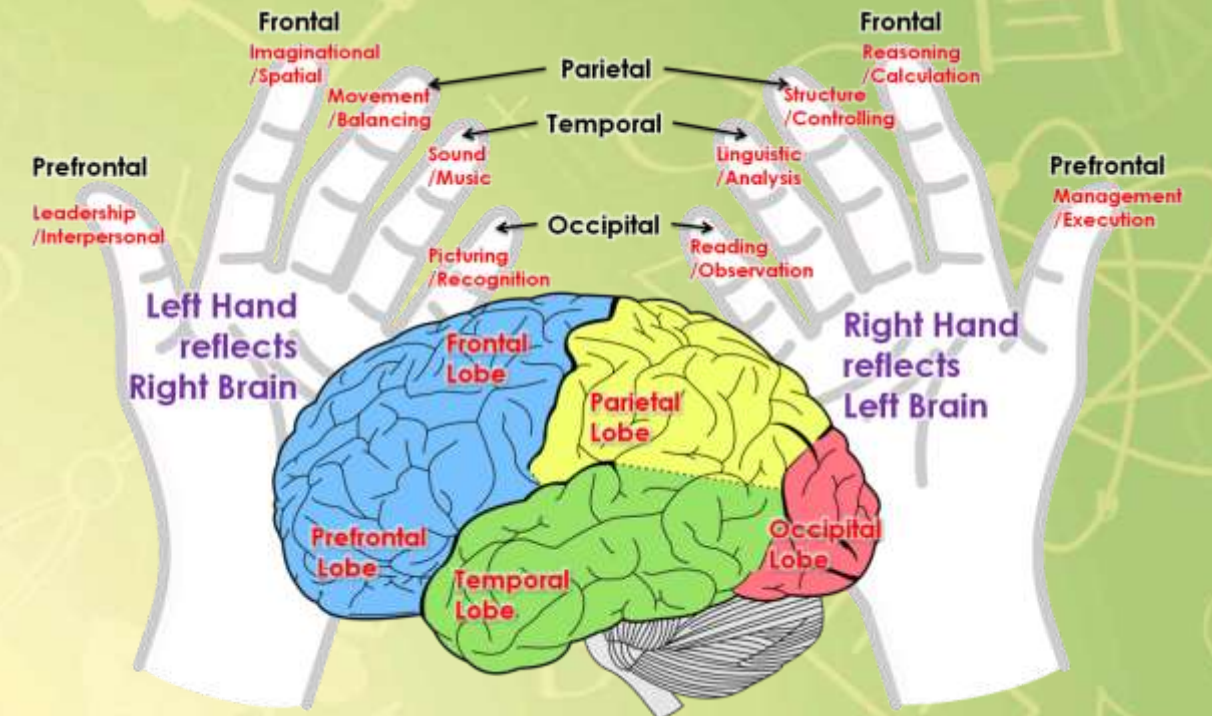

1. Every individuals included kindergarten, primary, junior, high school, university students, company staffs & entrepreneurs
2. Family, marriage, corporate, career, emotions, life attitudes, values of life, human relationships, ideology, telepathy, etc.

Fingerprints are a unique symbol for everyone. Once its completed formed during embryonic period will never changed until end of life.

## About ProSkill Inborn Talent Analysis

ProSkill Inborn Talent Analysis uncover the secret inside your brain. Our research team combined millions of cases from psychology, brain science, genetics, embryology, Dermatoglyphics to make a most accurate big data. The report is not only presented to you for life-changing but also improve your relationship with your friend & family members.

The human fingerprint is the best emitter of the whole brain. Each finger has a direct relationship with each part of the brain and can be subdivided into 10 kinds of intelligence.

## 10 Fingerprints vs. Left & Right Brain Function

Finger	Brain Lobes	Functions
L1	Right Prefrontal	Leadership, Interpersonal skill, Creativity, Goal Visualization, Motive Determination, Self Esteem, Intuition, The ability to understand others point of view.
R1	Left Prefrontal	Rational Thinking, Planning, Coordinating, Controlling, Executing Behavior, Self-Achievement, Self Motivation, Self Awareness.
L2	Right Frontal	Imagination, Idea Formation, Visualization, 3D recognition, Visual Spatial Ability, Hand-eye co-ordination.
R2	Left Frontal	Logical Reasoning, Computation Process, Analytical skills, Conceptual Understanding, Numeric, Grammar syntax, Cause and effect relationships.
L3	Right Parietal	Gross Motor Skills, Body Movement And Sensory information, Eyes body Co-ordination.
R3	Left Parietal	Fine Motor Skills, Action Identification and understanding, Finger control, Control Of Body Movements.
L4	Right Temporal	Tone understanding, Sound and Voice understanding, Music, Emotions, and Feelings.
R4	Left Temporal	Language Ability, Language Understanding, Audio Identification, Memory Ability, Syntax of language.
L5	Right Occipital	Visualization, Visual Appreciation, Art, Aesthetic Sense. Understanding of maps, Visuals, Graphical, Communications.
R5	Left Occipital	Visual Identification, Interpretation, Reading, Observation, Image appreciation, Recognition of shapes and colors.

# The Development and Argumentation of Brain Dominant Genes and Dermatoglyphics Science

Year 1680,  
Analyst Marcello Malpighi proposed papers on fingerprints, fingerprint patterns of the thumb, and confirmed that human fingerprints do have many key features with the whole brain cortex.

Year 1892,  
Professor Sir Francis Galton published his research highlighting the genetic relationship between fingerprints and siblings and twins and generations, and summarizing the partial consistency between their relatives.

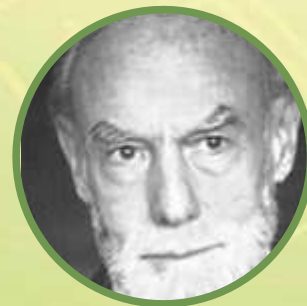

Year 1896,  
Sir Henry advocates The Henry Classification System for distinguishing different fingerprint patterns and is widely used.

Year 1902,  
American scholar Harris Hawthorne Wilder's study of morphology, genetics, and inter-ethnic fingerprints honors the complete systemic foundation of fingerprinting.

Year 1926,  
Professor Harold Cummins presented the term "Dermatoglyphics" at the American Society of Morphology. At this point, Dermatoglyphics has officially become a subject in the field of professional research.

Year 1981,  
Professor Roger W. Sperry and his research partner won the Nobel Biomedical Award for studying the brain function and brain theory of the whole brain. It is found that the genetic information of a person is most easily displayed on the ears, hair, and especially on the fingerprints.

# The Advantages of ProSkill Inborn Talent Analysis Report

- Comprehensive** : understanding individual intelligence, learning management, leadership style, job attributes, etc.
- Objectivity** : Measurement results are not affected by culture, environment, emotions, etc.
- Stability** : Provides reliable genetic information and only needs to be tested once in a lifetime
- Simple path** : simple, convenient, no pains, no need to answer questions
- Accuracy** : Accuracy can reach over 90%

## Which areas can the test report be applied to?

- ✓ Early childhood education development
- ✓ Adolescent parent-child relationship
- ✓ Middle school student
- ✓ Adult career
- ✓ Enterprise human resource management
- ✓ Marriage and family relations and many other fields

## Dedicated, professional to provide you with the following services

- ✓ 24 pages of professional test report
- ✓ Interpretation of professional reports
- ✓ Professional consulting
- ✓ Special lectures and discussion forum
- ✓ Educational solutions and resources
- ✓ Customized data analysis report
